

Introducing Lava™ DVS – Digital Veneering System

Technology – Superior Esthetics – Strength - Cost-effective Restoration
DVS has it all

- ✓ **Technology** - Void-free milled feldspathic porcelain – cad designed from the final restoration backward to ensure a maximum of 1.5mm of unsupported porcelain throughout the restoration.
- ✓ **Esthetics** – Three precisely controlled layers fused together result in a multi-layered look, superior to the flat look of pressed ceramics.

#13 DVS

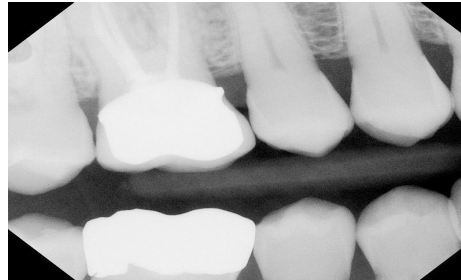

#10 DVS

- ✓ **Strength** - Fixed firing method – Rocatec bonding, added to the properly designed support eliminates fractures and porcelain delamination.

Shows the 3 layers of fused material, and properly designed core.

Properly designed core for maximum strength

- ✓ **Cost-effective** – Due to decreased labor involved and different levels of laboratory participation Central Dental Creations can offer this amazing new technology to you for less than the average PFM restoration.
